education

Simon Fraser University
B.S in Computer Science
Sept 2016 – Aug 2022

skills

- Python
- Kubernetes
- Vector
- Linux
- Bash
- Git
- ArgoCD
- Jenkins
- Ansible
- AWS
- Docker
- C/C++

experience

Netskrt Systems

Software Engineer 2 — April 2026 – Present

- Contributed to the design and implementation of a migration from legacy bare-metal (APT-based) deployments to a scalable, containerized platform using Kubernetes
- Developed and maintained Helm charts to standardize Kubernetes deployments, integrated with ArgoCD ApplicationSets for automated, GitOps-driven delivery
- Proposed and implemented a versioning and release strategy for containerized applications, improving consistency, traceability, and deployment reliability

Software Engineer — April 2024 – April 2026

- Contributed to implementation of a high-throughput observability pipeline using VictoriaLogs, Kafka, Grafana, and Vector, supporting a rapidly growing infrastructure footprint
- Helped identify critical areas for improvement in deployment scalability and consistency
- Created new tools to automate manual processes and improved existing ones with a focus on maintainability

Jr. Software Engineer — May 2023 – April 2024

- Productionalized and handed off several services to live operations, documenting health and performance metrics
- Wrote a set of Python tools to automated provisioning, reducing provisioning time by 90% and improving consistency

SAP

Software Developer Intern — May 2021 – Jan 2022

- Maintained and improved data acquisition microservices for a variety of data sources, ensuring performance and scalability
- Supported enterprise clients, resolving data acquisition issues in production, dealing with high-urgency on-call situations
- Identified crucial logging points to ensure effective monitoring of the microservice as well as useful debugging information

LDA Technologies

Software Developer Intern — May 2018 – Nov 2019

- Identified crucial health and performance metrics to validate each device before shipping to customers
- Implemented a diagnostics framework to run automated quality control tests, improving efficiency and accuracy
- Uploaded diagnostics results to a database, to track health and metrics of each sold device
